

Contents Processing

Series 1.0 VF 50 / VF 60

Contents	pages	I – VIII
System features	page	1
1 Preface	page	2
Characteristic data of material, regulations and standards relating to façades	page	3
2 Construction principle	pages	4 – 14
3 Determination of cutting to length for transom, glass and insert elements	pages	15 – 19
4 Glazing and insert elements	pages	20 – 27
5 Mullion – transom connections	pages	28 – 39
6 Supplementary bark-box transom profiles	pages	40 – 41
7 Mullion junctions	pages	42 – 50
8 Corner transom notch	pages	51 – 52
9 Assembling transoms and mullions as T-joints and cross joints	pages	53 – 55
10 Slanted transom	pages	56 – 57
12 Fixing the pressure plate profiles	pages	58 – 60
13 Vapour pressure equalization holes	page	61
14 Installation of glass supports in case of transom connections	page	62
15 Processing internal and external glazing gaskets without shaped pieces	pages	63 – 67
16 Possible combinations of cover profiles	page	68
17 Construction of external corner	page	69
18 Mullion - transom construction for polygonal area and sloping roofs	pages	70 – 75
19 Assembling the unitized elements (ladder construction) by means of tension joint	page	76
20 Mullion on top of steel sub-structure	pages	77 – 78
22 Examples of application	pages	79 – 83
23 Assembly instructions	pages	84 – 97
24 Technical façade	pages	102 – 104

	page
System features	1
1 Preface	2
1.1 General indications on processing profile systems	
Characteristic data of material, regulations and standards relating to façades	3
2 Construction principle	4
2.1 Variants of assembly for inlet transoms	4
2.1.1 Mullion - transom design	4
2.1.2 Mullion - transom construction as a unitized construction	5
2.2 Variants of assembly for deepened transoms	5
2.2.1 Mullion - transom design	5
2.2.2 Unit - transom assembly	6
2.2.3 Mullion - transom assembly with mullion fixed to the building structure	6
2.2.4 Mullion - transom assembly as a unitized construction (excluding glass) with split mullions	7
2.3 Mullion - transom connections with inlet transom	8
2.3.1 Mullion - transom design	8
2.3.2 Mullion - transom construction as a unitized construction	9
2.4 Mullion - transom connections	10
2.4.1 Mullion - transom connection with plastic t-bracket	10
2.4.1.1 T-joint with T-bracket art. no. 911 885 >911 889<	10
2.4.1.2 T-joint with plastic T-bracket	11
2.4.2 Unit - transom assembly	12
2.4.3 Mullion - transom assembly with mullion fixed to the building structure	13
2.4.4 Mullion - transom assembly as a unitized construction with split mullion	14
3 Determination of cutting to lengths for transom, glass and insert elements	15
3.1 Inlet transom VF 50	15
3.1.1 Glazing	15
3.1.2 Installing insert elements	15
3.2 Deepened transom VF 50	16
3.2.1 Glazing	16
3.2.2 Installing insert elements	16
3.3 Inlet transom VF 60	17
3.3.1 Glazing	17
3.3.2 Installing insert elements	17
3.4 Deepened transom VF 60	18
3.4.1 Glazing	18
3.4.2 Installing of insert elements	18
3.5 Inlet transom VF 50, mullion on steel VF 60	19
3.5.1 Glazing (VF 60, as described in chapter 3.3.1)	19
3.6 Deepened transom VF 50, mullion on steel VF 60	19
3.6.1 Glazing (VF 60, as described in chapter 3.4.1)	19

4	Glazing and insert elements	20
4.1	Inlay and deepened transom profiles	20
4.2	Mullion profiles	21
4.3	Inlet transom profiles and mullion profiles with the supplementary profiles 419 900 and 519 901	22
4.4	Deepened transom profiles and mullion profiles with the supplementary profiles 419 900 and 519 901	23
4.5	External pressure plate glazing gasket	24
4.6	Shaped gasket pieces	24
4.7	Transom housing gaskets	25
4.7.1	Transom housing gasket for inlet transom profiles	25
4.7.2	Transom housing gasket for deepened transom profiles	25
4.7.3	Transom housing gasket for slanted deepened transoms (made from metre-length material)	26
4.8	Supplementary profiles 419 900 and 519 901	27
4.8.1	Inlet transoms 519 310/311/312 >523 310/311/312< and 419 371	27
4.8.2	Deepened transoms 519 300/301/302/303 >523 300/301/ 302/303<	27
5	Mullion – transom connections	28
5.1	Inlet transom	28
5.1.1	Mullion processing movable point - fixed point	28
5.1.2	Mullion processing in case of unitized construction	29
5.2	Deepened transom	30
5.2.1	Mullion processing	30
5.2.2	Processing polygonal mullions	31
5.3	Fitting the supplementary profiles 419 135 and 419 136 into the split mullions	32
5.3.1	Installing gaskets	32
5.3.2	Assembling the split mullions with supplementary profiles	32
5.4	Installing T-brackets	33
5.4.1	T-brackets	33
5.4.1.1	Manual processing of mullions	33
5.4.2	T-bracket with spring pin and T-bracket for connecting rod	34
5.4.2.1	T-bracket with spring pin for deepened transom profiles	34
5.4.3	Tension joints for split mullions	35
5.4.4	Head and sill mullion processing	36
5.4.4.1	Head mullion notching	36
5.4.4.2	Sill mullion notching in case of vertical mullions	36
5.4.4.3	Gasket plate art. no. 906 826 – self-adhesive –	36
5.5	Processing transoms and mullions	37
5.5.1	Inlet transom, movable point / fixed point	37
5.5.1.1	Transom retainer art. no. 994 519 >994 619<	37
5.5.1.2	Processing the transom profile	37
5.5.1.3	Slanted transom	37
5.5.2	Inlet transom, unitized construction	38
5.5.2.1	Assembling mullions and transoms	38
5.5.2.2	Processing the transom profile	38
5.5.3	Deepened transom	39
5.5.3.1	Assembling mullions and transoms	39
5.5.3.2	Transom notches	39
5.5.3.3	Drilling the fixing drill holes	39

6	Supplementary bark-box transom profiles	40
6.1	Open supplementary profiles	40
6.2	Supplementary hollow profiles 550 700 >560 703<	41
7	Mullion junctions	42
7.1	Mullion joint with sliding connection	42
7.1.1	Straight joint (excluding split mullion)	42
7.1.2	Split mullions with straight joint	43
7.1.3	Field-by-field drainage	44 - 46
7.2	Mullion junction in case of bent mullion 1.0 VF 50 / VF 60	47 - 48
7.3	Mullion junction in case of bent mullion – internal corner -	49 - 50
8	Corner transom notch	51
8.1	Inlet transom 419 371	51
8.1.1	Notch in case of an internal / external corner of 45°-60°	51
8.2	Deepened transom 519 320 / 519 321	52
8.2.1	Notch in case of an internal / external corner of 45°-60°	52
9	Assembling transoms and mullions as t-joints and cross joints	53
9.1	Inlet transom	53
9.1.1	T-joint	53
9.1.2	Cross joint	53
9.2	Deepened transom	54
9.2.1	T-joint with T-bracket art. no. 994 626	54
9.2.2	Cross joint with T-bracket art. no. 994 627	54
9.3	Mullion profiles	55
9.3.1	T-joint with drainage profile 994 520 >994 620<	55
9.3.2	Cross joint with drainage profile 994 520 >994 620<	55
10	Slanted transom	56
10.1	Inlet transom	56
10.2	Deepened transom	57
12	Fixing the pressure plate profiles	
12.1	Rubber clip piece for fixing the cover caps	58
12.2	Fixing the façade fixing screws	58
12.3	Expansion joint plates for cover profiles	59
12.4	Processing the pressure plate profiles	60
12.4.1	Pressure plate profiles for polygonal mullions	60
12.4.2	Pressure plate profiles without cover profiles	60

13	Vapour pressure equalization holes	61
13.1	Processing the pressure plate glazing gasket in bending points	61
14	Installing glass supports in case of transom junctions	62
14.1	Installing glass supports in case of inlet transoms	62
14.2	Installing glass supports in case of deepened transoms	62
15	Processing internal and external glazing gaskets without shaped pieces	63
15.1	Gasket joints of internal glazing gaskets	63
15.2	Gasket joints with external pressure plate glazing gaskets excluding shaped pieces	64
15.2.1	Gasket joints in case of bent mullions	64
15.2.2	Gasket joints in case of polygonal mullions	65
15.3	Inlet transom, roof area	66
15.4	Deepened transom, roof area	67
16	Possible combinations of cover profiles	68
16.1	Inlet transom / deepened transom	68
17	Construction of external corner	69
17.1	Construction of internal corner	69
18	Mullion-transom construction for polygonal area and sloping roofs	70
18.1	Profiles and accessories for the various angles	70
18.1.1	Polygonal mullion 1.0 VF 50	70
18.1.2	Polygonal mullion 1.0 VF 60	70
18.2	Angle settings for polygonal mullions	71
18.3	Determination of cutting to lengths	72
18.3.1	Cutting to lengths for 1.0 VF 50	72
18.3.2	Cutting to lengths for 1.0 VF 60	73
18.4	Angle determination for mullion profiles	74
18.4.1	Position of cover profiles for mullion profiles bent at façade level	75
18.4.2	Position of cover profiles for polygonal mullions bent at façade level	75
19	Assembling the unitized elements (ladder construction) by means of tension joint	76
20	Mullion on top of steel sub-structure	77
20.1	Mullion profiles for load-bearing steel sub-structure	78

22	Examples of application	79
22.1	Connection examples	79
22.2	Vertical section including supplementary profiles	80
22.3	Slanted mullion	81
22.4	Mullion fixing by means of steel sword	82
22.5	Mullion processing for balustrades and scaffolding	83
23	Advise on installation	84
23.1	Planning	84
23.1.1	Measuring the preliminary building works	84
23.1.2	Fixing of dimensions for constructing the façade	84
23.2	Workshop operation for the basic mullion - transom design	84
23.2.1	Cutting	84
23.2.2	Work concerning the mullion profiles	84
23.2.2.1	System with inlet transom	84
23.2.2.2	System with deepened transom	84
23.2.3	Work concerning the transom profiles	85
23.2.3.1	System with inlet transom	85
23.2.3.2	System with deepened transom	85
23.3	Pre-assembly in the workshop	85
23.3.1	Mullion - transom design	85
23.3.1.1	Mullion profiles	85
23.3.1.2	Transom profiles	85
23.3.1.3	Supplementary transom profiles (system with inlet transom)	85
23.3.1.4	Pressure plate profiles	85
23.3.1.5	Cover profiles	85
23.3.2	Mullion - transom construction as a unitized construction (system with inlet transom)	86
23.3.2.1	Mullion profiles	86
23.3.2.2	Transom profiles	86
23.3.2.3	Pre-assembling the individual segments	86
23.3.2.4	Pressure plate profiles	86
23.3.2.5	Cover profiles	86
23.3.3	Mullion - transom construction as a unitized construction with split mullions (system with deepened transom)	86
23.3.3.1	Mullion profiles	86
23.3.3.2	Transom profiles	86
23.3.3.3	Pre-assembling the individual segments	86
23.3.3.4	Pressure plate profiles	86
23.3.3.5	Cover profiles	86
23.3.4	Mullion - transom construction with T-bracket with spring pin (system with deepened transom)	87
23.3.4.1	Mullion profiles	87
23.3.4.2	Transom profiles	87
23.3.4.3	Pressure plate profiles	87
23.3.4.4	Cover profiles	87
23.4	Assembly at the load-bearing basic mullion - transom construction	88
23.4.1	Assembling mullions in case of mullion - transom design	88
23.4.2	Mullion - transom assembly	89
23.4.3	Fixing the anchoring in case of mullion assembly to the building structure from sill to head	90

23.4.4	One-storey buildings	90
23.4.5	Transom assembly	91
23.4.6	Mullion - transom construction as a unitized construction (system with inlet transom) and mullion - transom construction as a unitized construction with split mullions (system with deepened transom)	91
23.4.7	Assembling supplementary profiles (system with inlet transom)	91
23.4.8	Sill area connection	91
	Inlet transom / deepened transom	92
23.4.9	Side and head connections	93
23.4.10	Inserting glass, panels and window elements	93
23.4.11	Field-by-field drainage	93
23.4.12	Panel installation in front of intermediate ceilings in case of vertical mullion expansion joint	94
23.4.13	Assembling the external pressure plate glazing gasket and the pressure plate profile with shaped gasket pieces	94
23.4.14	Assembling the external pressure plate glazing gasket and the pressure plate profile without shaped gasket pieces	95
23.4.15	Assembling cover profiles	95
23.4.16	Securing the cover profiles	96
23.4.17	Assembly aid for screen fixing	97
24	Technical façade	98
24.1	Mullion processing	98
24.1.1	Mullion processing art. no. 519 140 for inlet transom	98
24.1.2	Mullion processing art. no. 519 140 for deepened transom	99
24.1.3	Transom retainer art. no. 994 519	100
24.2	Transom processing	100
24.2.1	Transom processing for inlet transom	100
24.2.2	Transom processing deepened transom	101
24.3	Assembling mullions and transoms	101
24.3.1	Assembling mullions and inlet transoms (same as standard design)	101
24.3.2	Assembling mullions and deepened transoms (art. no. 519 340)	101
25	Supplements relating to processing VF 50 / VF 60	
25.1	Insulating profile end pieces VF 50 / VF 60	102
25.2	Gasket joints for the external pressure plate glazing gasket VF 50	103
25.2.1	Pressure plate glazing gasket (individual pressure plate glazing gasket) including sealing piece and sealing pad	103
25.3	Fixing the pressure plate profile VF 50	103
25.3.1	Pressure plate profile for individual pressure plate glazing gasket and snap in cover profile	103
25.4	Securing the cover profiles VF 50 / VF 60	104
25.5	Visible screw fittings for the pressure plate profiles VF 50	104
26	Flat pressure plate profile	
26.1	Processing the pressure plate profile 519 422	105
